

## REMARKS

The above amendments to claims 65 and 66, are being submitted in conjunction with the filing of a further RCE application in order to present for examination a further limitation to the independent claims relating to the cooling effect achieved, which is not seen in the manner now claimed in any of the references of record.

The examiner is urged to reconsider this application and reexamine the claims in view of the noted amendments and find the pending claims patentable over the art now of record.

Respectfully submitted,  
BACON & THOMAS, PLLC
